

MARIO

SUMMARY OF QUALIFICATIONS

Extremely ambitious full stack developer, soon to be University of Denver web development bootcamp graduate, and United States Air Force veteran with a Security+ certification and an active security clearance. Extensive SharePoint administration and front-end development experience in the defense and financial services industry. Experienced in development languages such as JavaScript, jQuery, Node.js, React.js, MongoDB, and Git. Strong communication and collaboration skills with an established team of developers and project managers. Desire to be the catalyst that inspires my teammates and organization to prosper.
